

### Case Study

### Power Station Projects (Electrical)

### Projects

**FGER Project at Aberthaw Power Station and Cogeneration Plant at Semlogistics, Milford Haven**

### Value

**£10,000,000**

### Project Outline

JW Morris is presently engaged on two significant Electrical & Instrumentation installation projects for Amec within the energy market at the following locations:-

- \* Flue Gas Emission Reduction project at RWE NPower Aberthaw Power Station to enable the station to operate under new European environmental regulations, which will cut SO<sub>2</sub> emissions by 95%.
- \* 49MW Combined Heat & Power Cogeneration Facility at Semlogistics Milford Haven.

### JW Morris Role

- \* JW Morris is engaged directly by Amec on the Aberthaw project and by Amec via Unit Engineers on the Milford Haven project.
- \* In both projects, JW Morris undertook the site electrical and instrumentation installation services including project management and planning services.
